- **BHBS is now an Affiliate partner with Qualifacts offering associate programs using CareLogic software to enable small to medium behavioral health agencies to get on a fully functional Electronic Health Record that is BH redesign AND Managed Care ready. And it's a perk that it is hosted by a team that specializes in Behavioral Health billing in Ohio, particularly the intricacies of how the new coding works and what is needed to be successful.**

Last quick thing before I pass off to our experts is one of the reasons our billing process is so successful is through the use of software interpretation tools we utilize that are available from EMS Healthcare Informatics.

They offer a full set of tools that make working with all of your various EDI files with ease. Go to [www.emscorp.biz](http://www.emscorp.biz) for more information.

My favorite newest product is the EMS Power Generator. This tool enables you to create a 270 batch eligibility file to send to Medicaid and Clearing houses from an excel spreadsheet. For more information, please email me directly and I can put you in touch with EMS and demonstrate the ease of use.
